-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 6 and 7 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, it is not clear how and in what manner the drive is controlled. In claim 7, the means of the claim is not clear.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either US 4,184,533 to Breitharth, US 3,704,743 to Edwards or GB 776,031.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,184,533 to Breitbarth and further in view of US 6,793,001 to Sakou et al.

Breitbarth substantially shows the invention as claimed except that he does not show to provide the shoot unit with a shoot cylinder upstream of the shooting head. However, Sakou et al. show that it is conventional to provide a shooting cylinder upstream of the shooting head such that to facilitate the mold material shooting process. It would have been obvious to provide the shooting unit of Breitbarth with the shooting cylinder of Sakou et al. to facilitate the mold material

shooting process. With respect to claims 9, 11, 13, and 16, it would have been obvious to those of ordinary skill in the foundry art to design appropriate number pair of vanes and the proper configuration of the vane in the shooting unit to obtain the optimal agitation for the molding material in the shooting unit through routine experimentation. With respect to claim 15, it would have been obvious to provide an arrangement for discharging any excess material in the shooting head such that to clear the shooting passage for the next cycle of the mold making process.

6. The patent to Edwards is cited to further show the state of the art.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.
